2 Reason for Field Safety Corrective Action (FSCA)*

1. Description of the product problem*

Mölnlycke has recently been informed by **GCMEDICA ENTERPRISE LTD.**, the legal manufacturer of the device in question, that a defect affecting the suction connecting tubing component **(2326503-00)** included within certain procedure packs has been identified that could lead to the component detaching from its shaft.

As a result of this information, Mölnlycke has decided to issue **a Field Safety Notice (Advisory Notice)** to all customers who have received affected Mölnlycke Trays containing the impacted component.

2. Hazard giving rise to the FSCA*

The assessment of this issue confirms a low risk and low defect rate, however, non-conforming products may remain on the market and lead to further complaints. FSN with Precautionary communications or pre-use inspections are not expected to effectively mitigate the issue, as the detachment cannot be reliably identified.

	3. Type of Action to mitigate the risk*	
3.	**1.
